III. INSTRUCTIONS TO BIDDERS

1.0 INTRODUCTION

1.1 General

Cochin Port is one of the 12 Major Ports in India. It is an all weather port located in the State of Kerala on the west coast of India (9o 58' N, 76o 16' E) within the Cochin lagoon, which has natural protection from the sea by the headlands of Fort Cochin and Vypeen. The entrance to the Port is through the sea outlet between the peninsular headland of Vypeen and Fort Cochin, popularly known as the 'Cochin Gut'. LNG Basin is situated at the northern side of the outer channel near the Cochin Gut.

On behalf of CoPA and IOCL, the EMPLOYER has constructed a jetty in the approach channel of Cochin Port at MULT area in Puthuvypeen and Capital dredging to attain a depth of (-) 14.50 m in the jetty basin was carried out in 2022-23. The pump house constructed behind the jetty contains 2 Jockey pumps and 6 Fire pumps for fire fighting operations, which needs a draft of (-) 3.0 m CD and (-) 4.0 CD respectively.

1.2 Scope of Work

The scope of work includes De-Siltation of the area under Fire Pump House at MULT Jetty by dredging in front of the MULT building deploying Cutter Suction Dredger and disposing of dredged material at designated dumping ground nearby the shore at a distance of not more than 500m away from the dredging site.

Though earlier at different occasions, dredging had carried out, the depth beneath the pump house is frequently silting up causing hindrance to the fire pump operations. Hence, it needs to attain sufficient depth beneath the pump house by removing the materials under the pump house directly or by indirect way ie. removing the silted up material from the front side of the pump house building suitably so as to collapse the material under the pump house and till attaining sufficient depth there.

13.0 CONFLICT OF INTEREST

13.1 The Contractor shall not have a Conflict of Interest and any breach hereof shall constitute a breach of the Agreement.

13.2 Contractor and Affiliates not to be otherwise interested in the Project.

The Contractor agrees that, during the term of this Agreement and after its termination, the Contractor or any Associate thereof and any entity affiliated with the Contractor, shall be disqualified from providing goods, works, services, loans or equity for any project resulting from or closely related to the Services and any breach of this obligation shall amount to a Conflict of Interest; provided that the restriction herein shall not apply after a period of five years from the completion of this Assignment or to consulting assignments granted by banks/ lenders at any time; provided further that this restriction shall not apply to consultancy/ advisory services provided to the Authority in continuation of this Consultancy or to any subsequent consultancy/ advisory services provided to the Authority in accordance with the rules of the Authority. For the avoidance of doubt, an entity affiliated with the Contractor shall

include a partner in the Contractor's firm or a person who holds more than 5% (five percent) of the subscribed and paid up share capital of the Contractor, as the case may be, and any Associate thereof.

13.3 Prohibition of conflicting activities

Neither the Contractor nor any Associate thereof/any entity affiliated with the Contractor nor their Personnel shall engage, either directly or indirectly, in any of the following activities:

- (i) during the term of this Agreement, any business or professional activities which would conflict with the activities assigned to them under this Agreement;
- (ii) after the termination of this Agreement, such other activities as may be specified in the Agreement; or
- (iii) at any time, such other activities as have been specified in the Bid as Conflict of Interest.

13.4 Guidance Note on Conflict of Interest is given below.

- 1) This Note further explains and illustrates the provisions of the Bid Document, if any, and shall be read together therewith, in dealing with specific cases.
- 2) Contractors should be deemed to be in a Conflict of Interest situation if it can be reasonably concluded that their position in a business or their personal interest could improperly influence their judgment in the exercise of their duties. The process for selection of Contractors should avoid both actual and perceived Conflict of Interest.
- 3) Conflict of Interest may arise between the Authority and a Contractor or between Contractors and present or future Concessionaries/ Contractors. Some of the situations that would involve Conflict of Interest are identified below:
 - a) Authority and Contractors
 - i) Potential Contractor should not be privy to information from the Authority which is not available to others; or
 - ii) Potential Contractor should not have defined the Project when earlier working for the Authority; or
 - iii) Potential Contractor should not have recently worked for the Authority overseeing the Project.
 - b) Contractors and Concessionaires/Contractors:
 - i) No Contractor should have an ownership interest or a continuing business interest or an on-going relationship with a potential Concessionaire/ contractor save and except relationships restricted to project-specific and short-term assignments; or
 - ii) no Contractor should be involved in owning or operating entities resulting from the Project; or
 - iii) no Contractor should Bid for works arising from the Project.

The participation of companies that may be involved as investors or consumers and officials of the Authority who have current or recent connections to the companies involved, therefore, needs to be avoided.

- 4) The normal way to identify Conflicts of Interest is through self-declaration by Contractors. Where a conflict exists, which has not been declared, competing companies are likely to bring this to the notice of the Authority. All conflicts must be declared as and when the Contractors become aware of them.
- 5) Another approach towards avoiding a Conflict of Interest is through the use of “Chinese walls” to avoid the flow of commercially sensitive information from one part of the Contractor’s company to another. This could help overcome the problem of availability of limited numbers of experts for the project. However, in reality effective operation of “Chinese walls” may be a difficult proposition. As a general rule, larger companies will be more capable of adopting Chinese walls approach than smaller companies. Although, “Chinese walls” have been relatively common for many years, they are an increasingly discredited means of avoiding Conflicts of Interest and should be considered with caution. As a rule, “Chinese walls” should be considered as unacceptable and may be accepted only in exceptional cases upon full disclosure by a Contractor coupled with provision of safeguards to the satisfaction of the Authority.
- 6) Another way to avoid Conflicts of Interest is through the appropriate grouping of tasks. For example, conflicts may arise if Contractors drawing up the terms of reference or the proposed Documentation are also eligible for the consequent assignment or project.
- 7) Another form of Conflict of Interest called “scope-creep” arises when Contractors advocate either an unnecessary broadening of the terms of reference or make recommendations which are not in the best interests of the Authority but which will generate further work for the Contractors. Some forms of contractual arrangements are more likely to lead to scope-creep. For example, lump-sum contracts provide fewer incentives for this, while time and material contracts provide built in incentives for Contractors to extend the length of their assignment.

13.5 Every Project contains potential Conflicts of Interest. Contractors should not only avoid any Conflict of Interest, they should report any present/ potential Conflict of Interest to the Authority at the earliest. Officials of the Authority involved in development of a project shall be responsible for identifying and resolving any Conflicts of Interest. It should be ensured that safeguards are in place to preserve fair and open competition and measures should be taken to eliminate any Conflict of Interest arising at any stage in the process.

The insurance shall be maintained in full force and effect during the whole time that these personnel are assisting in the execution of the Works. For a Sub-contractor's employees, the insurance may be effected by the Sub-contractor, but the Contractor shall be responsible for compliance with this Clause.

In respect of any persons employed by any Sub-contractor, the Contractor's obligations to insure these persons under this sub-clause shall be satisfied if the Sub-contractor shall have insured against the liability in respect of such persons in such manner that the Employer is indemnified under the policy, but the Contractor shall require such Sub-contractor to produce before the Employer such policy of insurance and the receipt for the payment of current premium.

The notice shall be given within 14 Days after the Party became aware, (or should have become aware), of the relevant event or circumstance constituting Force Majeure.

The Party shall, having given notice, be excused performance of such obligations

for so long as such Force Majeure prevents it from performing them.

Notwithstanding any other provision of this Clause, Force Majeure shall not apply to obligations of either Party to make payments to the other Party under the Contract.

15.3
Duty to Minimise
Delay

Each Party shall at all times use all reasonable endeavours to minimise any delay in the performance of the Contract as a result of Force Majeure.

A Party shall give notice to the other Party when it ceases to be affected by the Force Majeure.

15.4
Consequences of
Force Majeure

If the Contractor is prevented from performing any of his obligations under the Contract by Force Majeure of which notice has been given under Sub-Clause 15.2 [*Notice of Force Majeure*], and suffers delay and/or incurs Cost by reason of such Force Majeure, the Contractor shall be entitled subject to Sub-Clause 16.1 [*Contractor's Claims*] to:

- (a) an extension of time for any such delay, if completion is or will be delayed, under Sub-Clause 6.4 [*Extension of Time for Completion*], and
- (b) if the event or circumstance is of the kind described in sub para graphs (i) to (v) of Sub-Clause 15.1 [*Definition of Force Majeure*] and, in the case of sub paragraphs (ii) to (iv), occurs in the Country, payment of any such Cost.

15.6
Optional Termination,
Payment and Release

If the execution of substantially all the Works in progress is prevented for a continuous period of 84 Days by reason of Force Majeure of which notice has been given under Sub-Clause 15.2 [*Notice of Force Majeure*], or for multiple periods which total more than 140 Days due to the same notified Force Majeure, then either Party may give to the other Party a notice of termination of the Contract. In this event, the termination shall take effect 7 Days after the notice is given, and the Contractor shall proceed in accordance with Sub-Clause 12 [*Cessation of Work and Removal of Contractor's Equipment*].

Upon such termination, the Engineer shall determine the value of the work done and issue a Payment Certificate which shall include:

- (a) the amounts payable for any work carried out for which a price is stated in the Contract;
- (b) the Cost of Plant and Materials ordered for the Works which have been delivered to the Contractor, or of which the Contractor is liable to accept

delivery: this Plant and Materials shall become the property of (and be at the risk of) the Employer when paid for by the Employer, and the Contractor shall place the same at the Employer's disposal;

- (c) any other Cost or liability which in the circumstances was reasonably incurred by the Contractor in the expectation of completing the Works; and
- (d) the Cost of removal of Temporary Works and Contractor's Equipment from the Site and the return of these items to the Contractor's Works in his country (or to any other destination at no greater Cost).

15.7
Release from
Performance under the
Law

Notwithstanding any other provision of this Clause, if any event or circumstance outside the control of the Parties (including, but not limited to, Force Majeure) arises which makes it impossible or unlawful for either or both Parties to fulfill its or their contractual obligations or which, under the law governing the Contract, entitles the Parties to be released from further performance of the Contract, then upon notice by either Party to the other Party of such event or circumstance:

- (a) the Parties shall be discharged from further performance, without prejudice to the rights of either Party in respect of any previous breach of the Contract, and
- (b) the sum payable by the Employer to the Contractor shall be the same as would have been payable under Sub-Clause 15.6 [Optional Termination, Payment and Release] if the Contract had been terminated under Sub-Clause 15.6 [*Optional Termination, Payment and Release*].

16. Contractor's Claims

16.1
Contractor's Claims

If the Contractor considers himself to be entitled to any extension of the Time for Completion and/or any additional payment, under any Clause of these Conditions or otherwise in connection with the Contract, the Contractor shall give notice to the Engineer, describing the event or circumstance giving rise to the claim. The notice shall be given as soon as practicable as and not later than 28 Days after the Contractor became aware; or should have become aware, of the event or circumstance.

If the Contractor fails to give notice of a claim within such period of 28 Days, the Time for Completion shall not be extended, the Contractor shall not be entitled to additional payment, and the Employer shall be discharged from all liability in connection with the claim. Otherwise, the following provisions of this Sub-Clause shall apply.

The Contractor shall also submit any other notices which are required by the Contract, and supporting particulars for the claim, all as relevant to such event or circumstance.

The Contractor shall keep such contemporary records as may be necessary to substantiate any claim, either on the Site or at another location acceptable to the Engineer. Without admitting the Employer's liability, the Engineer may; after receiving any notice under this Sub-Clause, monitor the record-keeping and/or instruct the Contractor to keep further contemporary records. The Contractor shall

permit the Engineer to inspect all these records, and shall (if instructed) submit copies to the Engineer.

Within 42 Days after the Contractor became aware (or should have become aware) of the event or circumstance giving rise to the claim, or within such other period as may be proposed by the Contractor and approved by the Engineer, the Contractor shall send to the Engineer a fully detailed claim which includes full supporting particulars of the basis of the claim and of the extension of time and/or additional payment claimed. If the event or circumstance giving rise to the claim has a continuing effect:

- (a) this fully detailed claim shall be considered as interim;
- (b) the Contractor shall send further interim claims at monthly intervals, giving the accumulated delay and/or amount claimed, and such further particulars as the Engineer may reasonably require; and
- (c) the Contractor shall send a final claim within 28 Days after the end of the effects resulting from the event or circumstance, or within such other period as may be proposed by the Contractor and approved by the Engineer.

Within 42 Days after receiving a claim or any further particulars supporting a previous claim, or within such other period as may be proposed by the Engineer and approved by the Contractor, the Engineer shall respond with approval, or with disapproval and detailed comments. He may also request any necessary further particulars, but shall nevertheless give his response on the principles of the claim within such time.

Each Payment Certificate shall include such amounts for any claim as have been reasonably substantiated as due under the relevant provision of the Contract. Unless and until the particulars supplied are sufficient to substantiate the whole of the claim, the Contractor shall only be entitled to payment for such part of the claim, as he has been able to substantiate.

The Engineer shall proceed in accordance with Sub-Clause 3.4 [*Determinations*] to agree or determine (i) the extension (if any) of the Time for Completion (before or after its expiry) in accordance with Sub-Clause 6.4 [*Extension of Time for Completion*], and/or (ii) the additional payment (if any) to which the Contractor is entitled under the Contract.

The requirements of this Sub-Clause are in addition to those of any other Sub-Clause, which may apply to a claim. If the Contractor fails to comply with this or another Sub-Clause in relation to any claim, any extension of time and/or additional payment shall take account of the extent (if any) to which the failure has prevented or prejudiced proper investigation of the claim, unless the claim is excluded under the second paragraph of this Sub-Clause.

Refer Clause 2.39 [*Settlement of Disputes & Arbitration*] of Special Conditions of Contract.

17. Property in Excavated Materials

The Contractor shall at the same time, if so required by the Engineer, furnish calculation sheets in duplicate relating to the strength and anticipated deflections in respect of such altered/ modified Works. The Engineer will, after any such alteration which he may approve, record on the copies as amended his approval and will return one copy of the Drawings and calculation sheets to the Contractor, who shall carry out the work in accordance therewith. The Contractor shall forward to the Engineer three additional copies of the working Drawings and calculation sheets as approved, in addition to these working Drawings and calculation sheets as approved. In addition to these, working Drawings are also to be submitted (the same procedure as in the case of the Contractor) in respect of any work proposed to be executed by Sub-contractors. The approval of the Engineer of all or any of the calculation sheets, Drawings shall not relieve the Contractor of responsibility in connection with the execution of the altered/modified or Sub-contractor's Works.

V. TECHNICAL SPECIFICATIONS

1.0 SITE INFORMATION

1.1 Location

1.1.1 Cochin Port is one of the 12 Major Ports in India. It is an all weather port located in the State of Kerala on the west coast of India ($9^{\circ} 58' N$, $76^{\circ} 16' E$) within the Cochin lagoon, which has natural protection from the sea by the headlands of Fort Cochin and Vypeen. The entrance to the Port is through the sea outlet between the peninsular headland of Vypeen and Fort Cochin, popularly known as the 'Cochin Gut'.

1.1.2 The present Approach Channel comprises of an Outer Channel, Entrance Channel, LNG basin, ICTT Basin and two Inner Channels; the Ernakulum Channel and Mattancherry Channel.

1.2 Project Area

The project area is in front of the pump house building towards berth side at MULT jetty at Puthuvypeen as shown in Figure-1 below.

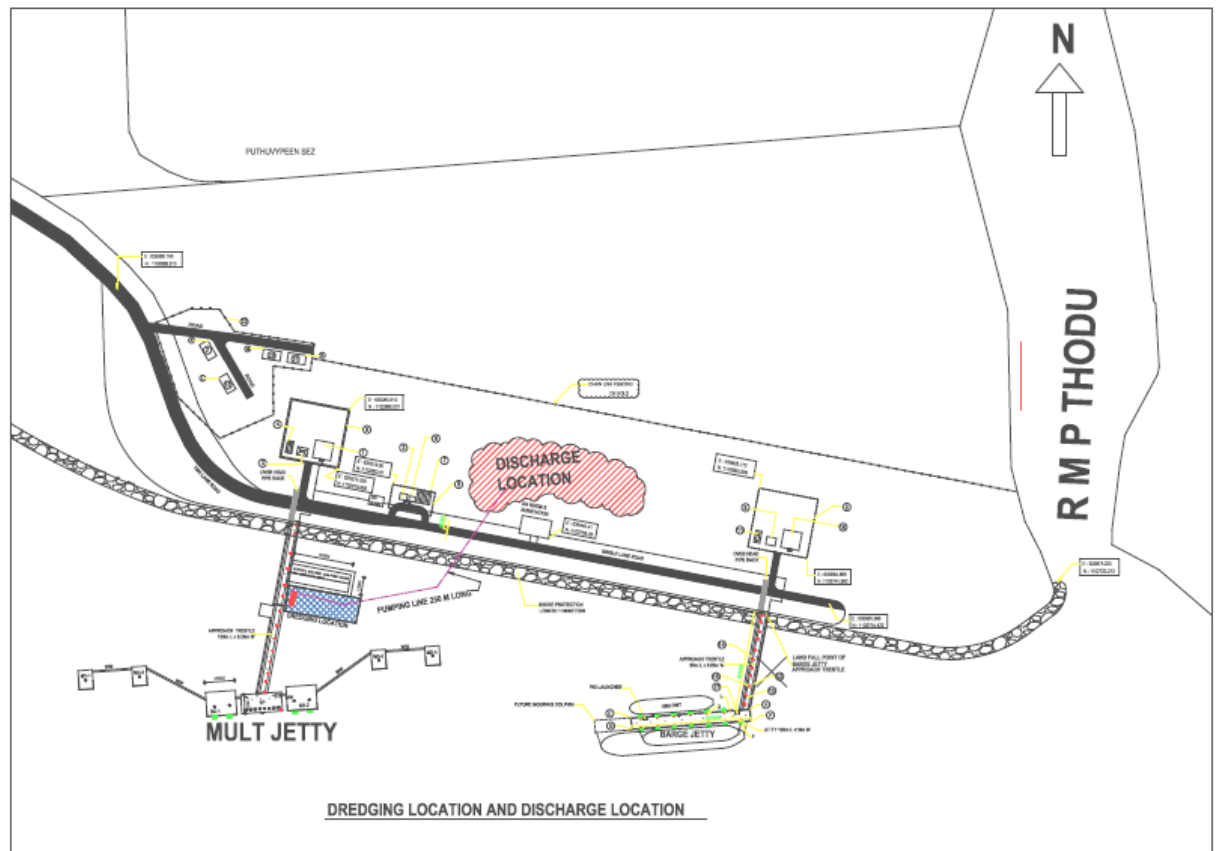

Figure-1 : Project Area

2. PROJECT BACKGROUND AND SCOPE OF WORK

On behalf of CoPA and IOCL, the EMPLOYER constructed the MULT jetty in the approach channel of Cochin Port in Puthuvypeen and Capital dredging to attain a depth of (-) 14.50 m in the jetty basin was carried out in 2022-23. The pump house constructed behind the jetty contains 2 Jockey pumps and 6 Fire pumps for fire fighting operations, which needs a draft of (-) 3.0 m CD and (-) 4.0 CD respectively.

Scope of Work

The scope of work includes De-Siltation of the area under Fire Pump House at MULT Jetty by dredging in front of the MULT building deploying Cutter Suction Dredger and disposing of dredged material at designated dumping ground nearby the shore at a distance of not more than 500m away from the dredging site.

Though earlier at different occasions, dredging had carried out, the depth beneath the pump house is frequently silting up causing hindrance to the fire pump operations. Hence, it needs to attain sufficient depth beneath the pump house by removing the materials under the pump house directly or by indirect way ie. removing the silted up material from the front side of the pump house building suitably so as to collapse the material under the pump house and till attaining sufficient depth there.

3.0 SITE INFORMATION

3.1 General

3.1.1 The whole coastal area is characterized by formation of the coastal land forms, which are made up of sand bars and barriers, sandy flats, mud flats and bars. The coastal plain is occupied by quaternary and recent sediments consisting essentially of sands, sandy clays, clays and carbonaceous clays.

3.1.2 The near shore area outside the Cochin Gut is relatively shallow reaching a water depth of 5 m at a distance of about 2 km from the shore and gradually deepening to 10 m at a distance of about 6 km outside the Gut. The sea bottom is mainly soft mud up to several meters deep in the near shore waters of Cochin.

3.1.3 The siltation in the Cochin Harbour area mainly takes place due to the deposition of the sediments from sea, which are stirred up during the wave action and brought inside the lagoon during the flood tide, whereas the siltation in the outer channel is mainly due to the phenomena of littoral drift.

3.2 Analysis Report on Side Scan Sonar Studies

No Side Scan studies have been conducted. The bidder may be permitted to conduct detailed studies if the Bidder wishes to do so at bidder's cost with prior permission of the Employer.

3.3 Geo-technical Investigations- Bore Hole Data

As the proposed area to be dredged is already dredged area and as per the scope of the work it is again dredging due to silted up in the recent time and as such there is no relevance on geo technical investigation reports.

3.4 Bathymetry and Seabed Features

- 3.4.1 The seabed slopes gently in the offshore region and is about 1 in 500 to 600. The coast experiences the littoral drift as anywhere else but there is a phenomenon of formation of the mud banks. The mud banks are not stationary and have a tendency to move in the coastal region.
- 3.4.2 Bar formation at the entry of the port is a natural phenomenon and it takes place during the southwest monsoon season. Hence, annual dredging is to be resorted to in order to keep the necessary depths and widths in the navigational channel. Littoral drift takes place during both the SW & NE monsoons as a result of which the channel experiences siltation. This effect gets compounded when material from the mud banks find its way to the entrance channel during the flood tides.
- 3.4.3 Bidder, if he so desires is free to conduct Hydrographic Survey at his own cost with prior permission of the Employer.

3.5 Meteorological Data

3.5.1 Wind

- 3.5.1.1 The wind speed and wind direction are determined by the season and by the daily temperature differences between land and sea. The predominant wind direction during the monsoon period, i.e., from June to September is west to south-west and the effect of land breeze is not dominant during this period.
- 3.5.1.2 During the non-monsoon periods, the predominant wind direction is from north-east during the morning and west during the evening, which shows influence of land breeze.
- 3.5.1.3 The maximum wind speed observed was of the order of 112 Km/hr from WSW direction.
- 3.5.1.4 The details of wind data is shown in Table-2 below

3.5.2 Cyclonic Storms and Depressions

Cochin lies beyond the cyclone belt and therefore the risk of cyclone is negligible.

3.5.3 Air Temperature

Temperature at Kochi varies from about 23° C to 33° C with no appreciable seasonal variations. The highest temperatures are recorded in the months of March to May. The average monthly maximum and minimum temperatures recorded at IMD station Kochi is presented in Table -3 below.

3.5.5 Rainfall

The average annual rainfall is reported as 3014.8 mm, and most of it is received in the period from May to October under the influence of south-west monsoons. June and July are the wettest months of the year, accounting for more than 50% of the annual rainfall. On an average, there are 124.1 rainy days in a year. The average monthly rainfall and rainy days recorded at IMD station Kochi is summarized in Table-5 below.

3.5.6 Visibility

The visibility in the dredging area is excellent, except for few days during monsoon.

3.6 Oceanographic Information

3.6.1 Waves

3.6.1.1 Deep-water Waves

The wave climate is governed by the South West monsoon when wave action can be strong with prevailing wave direction from North-West to South-West. Deep water (15m depth) wave observation in the past indicate the significant wave heights of 4m, 2m and 1m at water depths of 10m, 5m and 2m respectively, the predominant wave direction being West.

3.6.1.2 Wave action inside the harbour is insignificant because of narrow entrance between Vypeen Gut and Fort Cochin and the configuration of the land. Generally calm conditions prevail in the harbour basin throughout the year except during the times of extreme wind action.

3.6.1.3 Wave Rose diagram (Period and Height) near Cochin Port is presented in **Figure – 4** below.

3.6.2 Tides

Cochin experiences semi diurnal tides. The tidal levels as per Naval Hydrographic Chart No.2004 are as shown in Table – 6 below;

TABLE 6: TIDAL LEVELS AT KOCHI

Tidal Datum	Elevation (m, CD)
Highest Astronomical Tide (HAT)	+1.30m
Highest High-Water Level (HHWL)	+1.20m
Mean High Water Spring (MHWS)	+0.92m
Mean Low Water Spring (MLWS)	+0.80m
Mean Sea Level (MSL)	+0.582m
Mean High Water Neap (MHWN)	+0.60m
Mean Low Water Neap (MLWN)	+0.30m
Lowest Low Water Level	+0.20m
Lowest Astronomical Tide (LAT)	-0.20m

The above levels are with respect to Cochin Port's Chart Datum which is 0.582 m below the Mean Sea Level. Tides in the area are semidiurnal type with an average tide range of 0.6 m.

3.6.3 Currents

3.6.3.1 The currents along the coast of Cochin consists of tide, wave and wind induced components.

3.6.3.2 The tidal flow inside harbour basin, towards south bifurcates and flows around Willingdon Island giving rise to maximum current velocities both in Ernakulum and Mattancherry channels but their magnitude is different at different locations inside harbour. In the shallow natural channels on the northern side, velocities are low. While velocities during dry season follow a definite pattern, monsoon brings in large amount of fresh water and this gives rise to highly stratified conditions in the navigation channels. The distinct saline wedge which intrudes into channel was shown to exhibit sharp reversal of velocities. As can be expected, peak velocities occur at the Cochin Gut. As per observations, the maximum current velocities at the Cochin Gut during the non-monsoon periods are of the order of 3 knots, which could increase to as high as 5.5 knots during the monsoon periods. Inside the harbour the current velocities are low, of the order of 0.5 knots only, with directions varying at different locations. Maximum flood velocities during monsoon were observed at the bottom due to density currents.

2.0 THE WORK

2.1 Scope of work and Area to be Dredged/ Depth to be Achieved

- 2.1.1 On behalf of CoPA and IOCL, the EMPLOYER constructed the MULT jetty in the approach channel of Cochin Port in Puthuvypeen and Capital dredging to attain a depth of (-) 14.50 m in the jetty basin was carried out in 2022-23.
